

```
class Enemy {  
  
    //Properties , variable  
    var health = 100  
    var attackStrength = 10  
    //method หรือ func  
    func move() {  
        print("Walk Forwards.")  
    }  
    func attack(){  
        print("Land a hit , dose \"(attackStrength) damage.\" )  
    }  
}
```
